

GE INDUSTRIAL MOTORS
a **WOLONG** company

GE Industrial Motors – i-ALERT® – Monitoring Solution

Sensor | App | Ai Platform

FEATURES & BENEFITS

Asset Intelligence

Monitor the equipment health of any rotating machine such as pumps, motors, fans, and more.

Stay Safe

A Bluetooth® Smart wireless connection allows monitoring from a safe distance.

Save Time

Quickly scan multiple machines at once and cover more equipment with less resources, freeing time for analysis and troubleshooting.

Easy to Use

Put machine monitoring in the hands of the everyday user.

Early Detection

Unplanned machine failures can cost 10 times more than planned maintenance.

Solve Problems

Advanced vibration diagnostic tools are available to anyone who can use a smart phone or tablet.

Bluetooth Sensors

Monitor tri-axial vibration, temperature, and run-time hours

Mobile App

Monitor your machine right from your phone with the free mobile app

Gateway

Add remote monitoring capabilities by leveraging remote data collection devices

Ai Platform

Monitor all of your SmART-ALERT sensors and machines from a simple web interface

Scalable Predictive Maintenance at Any Level

Troubleshooting

- On-Demand Vibration & Temperature
- Around the Clock Trends
- Retrieve Vibration Spectrum on Demand or in Alarm

Route Based Monitoring

- Manage Team Data Collection Activities
- View Consolidated Data from All Assets
- Automated Reports & Notifications

Remote Monitoring

- 24/7 Continuous Monitoring
- Plug and Play Configuration (Auto-detect)
- Typical Range of 30-100m (100-300ft)

Full Integration

- Data Integration
- RESTful API (Real-Time data feed)
- Data Historian System Integration (OMF)

Flexible Data Collection and Access
